INCEPTION QUESTIONNAIRE**

'Impact Assessment of climate change on the sandy shorelines of the Caribbean: alternatives for its control and resilience'

The Sandy Shorelines project requests your input into this inception questionnaire to establish the state of member states' efforts to monitor and manage coastal erosion in the region. Your answers are critical to the success of this inception workshop. Please fill in to the best of your knowledge and return to cscsurvey@acs-aec.org by the 21st of July 2017.

Name	
Institution	

1. Does your country have a national erosion monitoring network?

Yes

No

2. How many monitoring points are there in this network?

3. Briefly describe the data collection methodology used at monitoring points (remote sensing analysis, fixed point measurements etc.)?

4. Are you aware of any national or local reports on coastal erosion which can be shared (projects, national environmental reports etc.)?

5. What are your country’s main needs in terms of costal erosion management (use scale whereby 1 is the least important and 5 is the most important)?

	1	2	3	4	5
Remote sensing data					
Training in monitoring techniques					
Monitoring equipment					
Software					
Other Technical assistance					
Other (specify)					

6. What is your current level of collaboration on coastal erosion research with other countries?

None	Very Low	Low	Moderate	High Level	Very High

7. What is your current level of collaboration on coastal erosion research with other international institutions?

None	Very Low	Low	Moderate	High Level	Very High

8. What are your main expectations of this project?
